

UNITED STATES PATENT OFFICE

165,557

CALCULATING MACHINE

Joseph C. Sinel, San Francisco, Calif., assignor to
Marchant Calculating Machine Company, a
corporation of California

Application February 12, 1949, Serial No. 819

Term of patent 14 years

(Cl. D64—11)

To all whom it may concern:

Be it known that I, Joseph C. Sinel, a citizen of the United States, residing at San Francisco, in the county of San Francisco and State of California, have invented a new, original, and ornamental Design for a Calculating Machine, of which the following is a specification, reference being had to the accompanying drawing, forming a part thereof, in which:

Fig. 1 is a top view of a calculating machine showing my new design.

Fig. 2 is a front perspective view of the same machine.

Fig. 3 is a rear perspective view of the same machine.

The dominant feature of my design resides in the forwardly extending part of the back and side covers which partly envelop the carriage,

and the rearwardly extending portion of the keyboard cover which envelops the front edge of said carriage, the combination of covers thereby forming a tunnel-like housing for the carriage but reserving an open space through which the numerals in the carriage are displayed.

I claim:

The ornamental design for a calculating machine, as shown and described.

JOSEPH C. SINEL.
